Installation

PRIOR TO CONNECTING

CHECK THAT THE VOLTAGE on the rating plate corresponds to the voltage in your home.

ENSURE the oven cavity is empty before mounting.

ENSURE THAT THE APPLIANCE IS NOT DAMAGED.

Check that the oven door closes firmly against the door support. Empty the oven and clean the interior with a soft, damp cloth.

DO NOT OPERATE THIS APPLIANCE if it has a damaged mains cord or plug, if it is not working properly, or if it has been damaged or dropped. Do not immerse the mains cord or plug in water. Keep the cord away from hot surfaces. Electrical shock, fire or other hazards may result.

AFTER CONNECTING

THE OVEN CAN BE OPERATED ONLY if the oven door is firmly closed.

THE EARTHING OF THIS APPLIANCE is compulsory. The manufacturer will accept no responsibility for injury to persons, animals or damage to objects arising from the non-observance of this requirement.

The manufacturers are not liable for any problems caused by the user's failure to observe these instructions.

Important safety instructions

READ CAREFULLY AND KEEP FOR FUTURE
REFERENCE

DO NOT HEAT, OR USE FLAMMABLE MATERIALS in or near the oven. Fumes can create a fire hazard or explosion.

DO NOT USE YOUR APPLIANCE FOR DRYING TEXTILES, PAPER, SPICES, HERBS, WOOD, FLOWERS, FRUIT OR OTHER COMBUSTIBLE MATERIALS. FIRE COULD RESULT.

IF MATERIAL INSIDE / OUTSIDE THE OVEN SHOULD IGNITE OR SMOKE IS OBSERVED, keep oven door closed and turn the oven off. Disconnect the power cord or shut off power at the fuse or circuit breaker panel.

DO NOT OVER-COOK FOOD. Fire could result.

DO NOT LEAVE THE OVEN UNATTENDED, especially when using paper, plastic or other combustible materials in the cooking process. Paper can char or burn and some plastics can melt if used when heating foods.

DO NOT USE corrosive chemicals or vapors in this appliance. This type of oven is specifically designed to heat or cook food. It is not designed for industrial or laboratory use.

ONLY ALLOW CHILDREN to use the oven without adult supervision after adequate instructions have been given so that the child is able to use the oven in a safe way and understands the hazards of improper use. The appliance is not intended for use by young children or infirm persons without supervision. Young children should be supervised to ensure that they do not play with the appliance. If your oven has a combination mode, children should only use the oven under adult supervision due to the high temperatures generated.

DO NOT USE YOUR APPLIANCE FOR HEATING ANYTHING IN AIRTIGHT SEALED CONTAINERS. THE PRESSURE INCREASES AND MAY SPATTER CAUSE DAMAGE WHEN OPENING OR MAY EXPLODE.

THE DOOR SEALS AND THE DOOR SEAL AREAS must be regularly inspected for damage. If these areas are damaged the appliance should not be operated until it has been repaired by a trained service technician.

EGGS

DO NOT USE THE MICROWAVE FUNCTION for cooking or reheating whole eggs with or without shell since they may explode even after microwave heating has ended.

Precautions

GENERAL

THIS APPLIANCE IS DESIGNED FOR DOMESTIC USE ONLY!

THE APPLIANCE SHOULD NOT BE OPERATED without food in the oven when using microwaves. Operation in this manner is likely to damage the appliance.

IF YOU PRACTICE OPERATING the oven, put a bowl of water inside. The water will absorb the microwave energy and the oven will not be damaged.

DO NOT USE THE CAVITY for any storage purposes.

REMOVE WIRE TWIST-TIES from paper or plastic bags before placing bag in the oven.

DEEP-FRYING

DO NOT USE YOUR APPLIANCE FOR DEEP-FRYING, BECAUSE THE OIL TEMPERATURE CANNOT BE CONTROLLED.

USE HOT PADS OR OVEN MITTS to prevent burns, when touching containers, oven parts, and pan after cooking.

LIQUIDS

E.G. BEVERAGES OR WATER. Overheating the liquid beyond boiling point can occur without evidence of bubbling. This could result in a sudden boiling over of the hot liquid. To prevent this possibility the following steps should be taken:

1. Avoid using straight-sided containers with narrow necks.
2. Stir the liquid before placing the container in the oven and let the teaspoon remain in the container. Be sure not to allow the teaspoon to touch the oven sides, or ceiling whilst microwaving, or sparking can occur.
3. After heating, allow standing for a short time, stirring again before carefully removing the container from the oven.

CAREFUL

DO NOT USE THE MICROWAVE FUNCTION when cooking or reheating food that contains alcohol.

AFTER HEATING BABY FOOD or liquids in a baby bottle or in a baby food jar, always stir thoroughly and check the temperature before serving.

This will ensure that the heat is evenly distributed and the risk of scalding or burns can be avoided.

Ensure the Lid and the Teat is removed before heating!

TEMPERATURE COOKING

THE TEMPERATURE PROBE should normally be inserted so that the tip of the probe is positioned in the thickest part of the food, as this is the part that takes the longest time to heat.

THE TIP OF THE PROBE must not touch any bones. Also, avoid placing the probe in fatty areas of the food as these areas heat up more quickly giving misleading temperatures.

The probe should, if possible, be positioned so that the tip does not touch the walls or the bottom of the cooking vessel.

THE TEMPERATURE which is set must be higher than the current temperature of the food.

IT IS NOT POSSIBLE to use the probe when making sweets, jam and marmalade, or dishes which need to be cooked or simmered for a long period. This is because the highest temperature which can be set is 90°C.

NEVER IMMERSE the probe in water when cleaning. Simply wipe clean with a clean, damp cloth or kitchen roll after use.

THE OVEN MUST NOT BE OPERATED with the temperature probe in the cavity if it is not plugged into the oven.

If you do operate the oven without complying with the above you will damage the probe.

Accessories

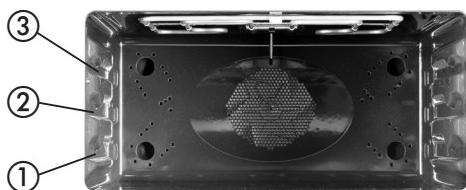

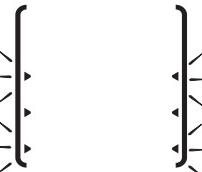

GENERAL

THERE ARE a number of accessories available on the market. Before you buy, ensure they are suitable for microwave use.

ENSURE THAT THE UTENSILS YOU USE are oven proof and allow microwaves to pass through them before cooking.

LEVEL INDICATOR

WHEN SOME FUNCTIONS ARE SELECTED, the level indicators will flash and light up. First the levels possible to use with this function flashes briefly and then the recommended level to use with the function is lit. In this example the level 1 & 3 would flash briefly leaving the recommended level 2 lit.

BAKING PLATE

USE THE BAKING PLATE when cooking or baking.
NEVER USE IT in combination with microwaves.

PROBE

THE PROBE IS DESIGNED to be used with Pro Roasting function only.
It is not possible to use the probe in any other function. It measures the internal temperature of your food and displays it on the display.
NEVER IMMERSE the probe in water when cleaning. Simply wipe clean with a damp cloth or kitchen roll after use.

GLASS DRIP TRAY

USE THE GLASS DRIP TRAY beneath the wire shelf. It may also be used as a cooking utensil or as a baking plate.

The Glass Drip Tray is used to collect the dripping juices and food particles that otherwise would stain and soil the interior of the oven.

ALWAYS USE THE GLASS DRIP TRAY when using microwaves.

It shall be placed on shelf level 1. Avoid placing vessels directly on the oven bottom.

WIRE SHELF

USE THE WIRE SHELF with all cooking methods, except when using the Microwave function only. The Wire shelf allows hot air circulation around the food and can be placed with the high end up or down to adjust the distance from the grill element. When you put food directly on the Wire shelf, place the Glass drip tray under it.

COVER

THE COVER is used to cover food during cooking and reheating with microwaves only and helps to reduce spattering, retain food moisture and reduces cooking time.

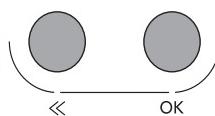

USE THE COVER for two level reheating.

Start protection / child lock

CHILD LOCK

THIS FUNCTION IS TURNED ON/OFF by pressing the Back and OK buttons simultaneously for 5 seconds until the key symbol is displayed. No buttons or knobs will function when this safety feature is activated.
IT CAN BE TURNED ON/OFF AT ANY TIME even during cooking.

START PROTECTION

THIS AUTOMATIC SAFETY FUNCTION IS ACTIVATED ONE MINUTE AFTER the oven has returned to "stand by mode". (The oven is in "stand by" when the 24-hour clock is displayed or if the clock has not been set, when the display is blank).
THE DOOR MUST BE OPENED AND CLOSED e.g. putting food into it, before the safety lock is released.
Else the display will show "**DOOR**".

Cooking Level Adjustment

IS AVAILABLE IN THE AUTO REHEAT FUNCTION:

In this function, you have the possibility to personally control the end result through the Cooking Level Adjustment feature. This feature enables you to achieve higher or lower end temperature compared to the default standard setting.

| DONENESS | |
|-------------------------|---------------------------------------|
| LEVEL | EFFECT |
| COOKING LEVEL +2 | YIELDS HIGHEST END TEMPERATURE |
| COOKING LEVEL +1 | YIELDS HIGHER END TEMPERATURE |
| COOKING LEVEL 0 | DEFAULT STANDARD SETTING |
| COOKING LEVEL -1 | YIELDS LOWER END TEMPERATURE |
| COOKING LEVEL -2 | YIELDS LOWEST END TEMPERATURE |

Cooling down

WHEN A FUNCTION IS FINISHED, the oven may carry out a cooling procedure. This is normal and switches off automatically when finished.

THE OVEN IS IN "STAND BY" when the 24 hour clock is displayed. The displaying of the clock can be turned off by turning the function knob to the zero position and pressing the Back button.

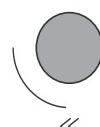

WHEN USING this function the oven chooses the default standard setting. This setting normally gives you the best result. This is done by adjusting the Cooking Level with the adjust knob right after you have pressed the Start button.

NOTE:

THE COOKING LEVEL can only be set or altered during the first 20 seconds of operation.

THE COOLING PROCEDURE can be interrupted without any harm to the oven by opening the door.

Auto reheat

WHEN YOU ARE SAVING a meal in the refrigerator or "plating" a meal for reheating, arrange the thicker, denser food to the outside of the plate and the thinner or less dense food in the middle.

PLACE THIN SLICES of meat on top of each other or interlace them.

THICKER SLICES such as meat loaf and sausages should be placed close to each other.

1-2 MINUTES STANDING TIME ALWAYS IMPROVES the result, especially for frozen food.

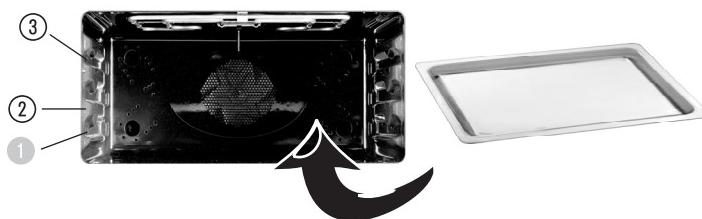

ALWAYS COVER THE FOOD when using this function except when reheating chilled soups in which case a cover is not needed!

IF THE FOOD IS PACKAGED in such way that it already have a cover, the package should be cut or scored 2-3 times to allow excess pressure to escape during.

PLASTIC FOIL should be scored or pricked with a fork, to relieve the pressure and to prevent bursting, as steam builds-up during cooking.

| RECOMMENDED WEIGHTS | | |
|--|---|---|
| | DINNER PLATE , chilled (250g - 500g) | PREPARE FOOD IN LINE WITH RECOMMENDATIONS ABOVE. HEAT UNDER COVER. |
| | DINNER PLATE , frozen (250g - 500g) | FOLLOW THE DIRECTIONS ON PACKAGE, IE. VENTILATION, PRICKING AND SO ON. |
| | SOUP , chilled (1 - 4 Servings) | REHEAT UNCOVERED IN SEPARATE BOWLS OR IN A LARGE ONE. |
| | BEVERAGE (1 - 4 Servings) | HEAT UNCOVERED AND USE A METAL SPOON IN A MUG OR CUP. |
| FOR FOOD NOT LISTED IN THIS TABLE and if the weight is lesser or greater than recommended weight, you should follow the procedure for "Cook and reheat with microwaves" | | |

ALWAYS PLACE THE FOOD on the Glass Drip Tray on shelf level I.

Manual defrost

FOLLOW THE PROCEDURE for “Cook & Reheat with microwaves” and choose power level 160 W when defrosting manually.

CHECK AND INSPECT THE FOOD REGULARLY. Experience will give you the times needed for various amounts.

FROZEN FOOD IN PLASTIC BAGS, plastic films or cardboard packages can be placed directly in the oven as long as the package has no metal parts (e.g. metal twist ties).

THE SHAPE OF THE PACKAGE alters the defrosting time. Shallow packets defrost more quickly than a deep block.

SEPARATE PIECES as they begin to defrost. Individual slices defrost more easily.

SHIELD AREAS OF FOOD with small pieces of aluminum foil if they start to become warm (e.g. chicken legs and wing tips).

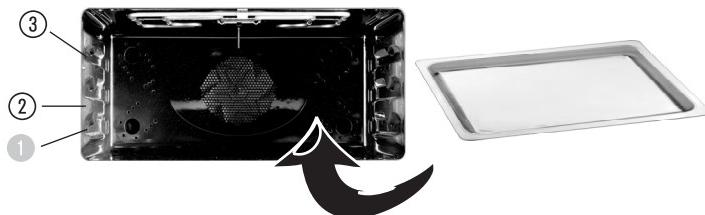

TURN LARGE JOINTS halfway through the defrosting process.

BOILED FOOD, STEWS AND MEAT SAUCES defrost better if stirred during defrosting time.

WHEN DEFROSTING it is better to underthaw the food slightly and allow the process to finish during standing time.

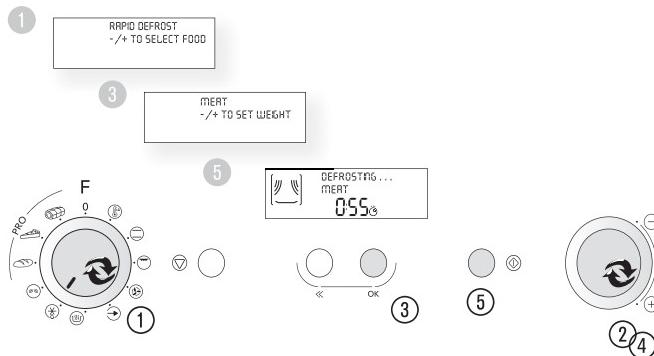

STANDING TIME AFTER DEFROSTING ALWAYS IMPROVES the result since the temperature will then be evenly distributed throughout the food.

ALWAYS PLACE THE FOOD on the Glass Drip Tray on shelf level 1.

Rapid defrost

USE THIS FUNCTION for defrosting Meat, Poultry, Fish, Vegetables and Bread. Rapid Defrost should only be used if the net weight is between 100 g - 3.0 kg.

1. **TURN THE MULTIFUNCTION KNOB** to the Rapid Defrost position.
2. **TURN THE ADJUST KNOB** to select the type of food you want to defrost.
3. **PRESS THE OK BUTTON** to confirm your selection. You will automatically be taken to the next setting.
4. **TURN THE ADJUST KNOB** to set the weight of the food.
5. **PRESS THE START BUTTON.**

MIDWAY THROUGH THE DEFROSTING PROCESS the oven stops and prompts you to **TURN FOOD**.

- Open the door.
- Turn the food.
- Close the door and restart by pressing the Start button.

AT THE END OF THE DEFROSTING PROCESS the oven automatically switches to manual defrost mode and waits for you to set a time for further defrosting. If no further defrosting is required at this time, press the Stop button, open the door and remove the defrosted food.

ALWAYS PLACE THE FOOD on the Glass Drip Tray on shelf level 1.

Probe placement

CHICKEN

WHEN THE PROBE is used to roast chicken, the tip should be positioned in the fleshiest part of the chicken, i.e. on the inside of the thigh just behind the leg. It must not touch any bones.

PORK

WHEN COOKING PORK, e.g. pork shoulder, gammon, silverside, etc, the probe should be inserted into the 'end' of the joint rather than through the layer of fat on the surface. Avoid placing the tip of the probe in fatty areas of the pork.

LAMB

WHEN COOKING A LAMB JOINT/LEG OF LAMB, insert the tip of the probe into the thickest part so that it does not touch the bone.

FISH

THE PROBE CAN BE USED WHEN COOKING WHOLE FISH, large fish such as pike or salmon. Position the tip of the probe in the thickest part, not too close to the backbone.

Maintenance & cleaning

CLEANING IS THE ONLY MAINTENANCE normally required.

FAILURE TO MAINTAIN THE OVEN in a clean condition could lead to deterioration of the surface that could adversely affect the life of the appliance and possibly result in a hazardous situation.

- **DO NOT USE METAL SCOURING PADS, ABRASIVE CLEANSERS, steelwool pads, gritty washcloths, etc.** which can damage the control panel, and the interior and exterior oven surfaces. Use a sponge with a mild detergent or a paper towel with spray glass cleaner. Apply spray glass cleaner to a paper towel. **DO NOT SPRAY directly on the oven.**

AT REGULAR INTERVALS, especially if spill overs have occurred, wipe the base of the oven clean.

USE A MILD DETERGENT, water and a soft cloth to clean the interior surfaces, front and rear of the door and the door opening.

- **DO NOT ALLOW GREASE** or food particles to build up around the door.

FOR STUBBORN STAINS, boil a cup of water in the oven for 2 or 3 minutes. Steam will soften the marks.

- **DO NOT USE STEAM CLEANING APPLIANCES** when cleaning your appliance.

ADDING SOME LEMON JUICE to a cup of water, placing this on Glass drip tray and boiling for a few minutes can eliminate odors inside the oven.

THE GRILL ELEMENT does not need cleaning since the intense heat will burn off any splashes, but the ceiling above it may need regular cleaning. This should be done with warm water, detergent and a sponge.

- Twist and remove the ceramic hook.
- Fold down the front end of the grill element to access the ceiling for cleaning.

CAREFUL CLEANING:

THE PROBE should be cleaned with a mild detergent and water.

- **NEVER IMMERSE** the probe in water when cleaning. Simply wipe clean with a clean, damp cloth or kitchen roll after use.
- **DO NOT USE STEEL-WOOL PADS.** This will scratch the surface.
